# GOLDEN OPPORTUNITY

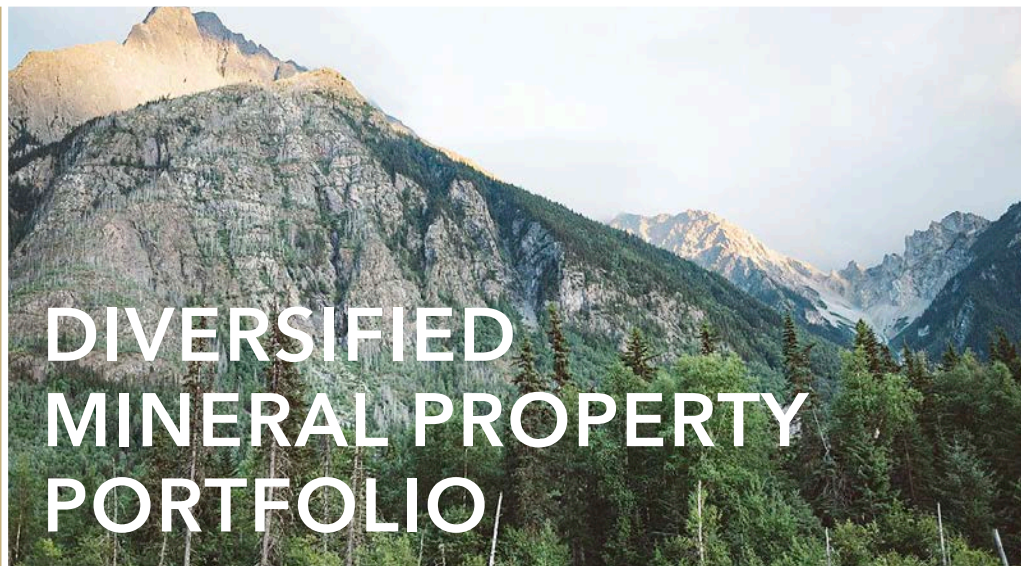

MREY CSE 2DK FSE

- Trading on CSE: MREY FSE: 2DK
- Focused on over 670 sq km in Western Australia's Pilbara Basin
- Great Jurisdiction - Western Australia Ranks 2nd in overall investment attractiveness\*
- Management and Directors have history of Success at unlocking value
- Advanced search to add to mineral property portfolio

## GROWTH STRATEGY FOR 2019

- Acquire further prospective gold properties in the Pilbara Basin in Western Australia
- Begin exploration of 140 sq km Sherlock River Property on the Eastern Flank of the Pilbara Basin
- Begin analysis of the 525 sq km of CTRR Mining tenements
- Carry out exploration for a potential copper porphyry on the Cobalt Mountain project
- OTCQB Listing - Expanding US retail market

\*2018 Fraser Institute Annual Mining Survey

## DIVERSIFIED MINERAL PROPERTY PORTFOLIO

### Pilbara Gold Properties

- 140 sq km Sherlock River property in Western Australia abuts Pacton Gold's property, where Segue Resources identified gold nuggets shedding from Mallina Basin conglomerates, prior to Pacton buying the property from Segue
- 525 sq. km. CTRR Mining Tenements - closed purchase April 1, 2019

**Cobalt Mountain property in BC provides opportunity to participate in the exploration for large scale copper and cobalt mineralization**

- property is highly prospective for gold, silver, copper, cobalt, lead and zinc

## MANAGEMENT

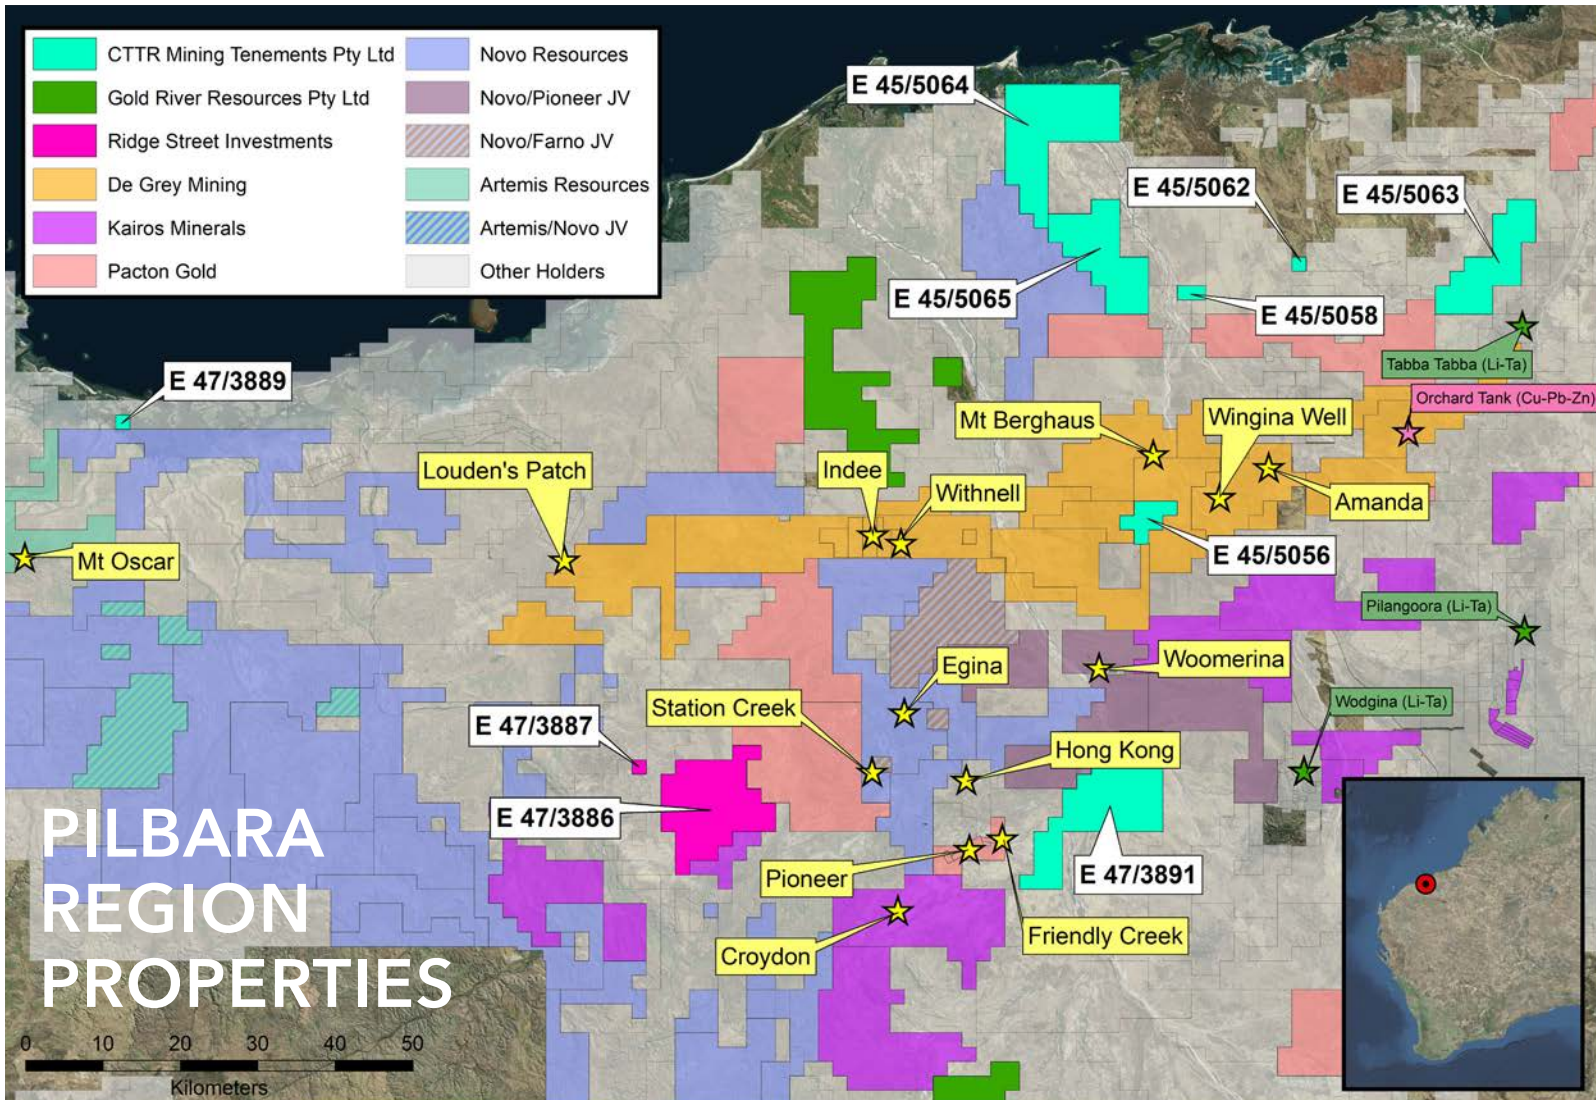

**James Macintosh** (Ontario, Canada)  
President, Chief Executive Officer and Director

**Guy Le Page** (Perth, Australia)  
Non-Executive Chairman and Director

**Julio DiGirolamo** (Ontario, Canada)  
Chief Financial Officer, Corporate Secretary and Director

**Kyler Hardy** (British Columbia, Canada)  
Board of Directors

## Sherlock River Property (Ridge Street Investments) 140 sq km

- Sherlock River Property lies approximately 15 km to the west of Novo Resources' Station Creek Gold Project and 17 km to the west of Novo's Egina Gold Project. To the east of the Property, Pacton Gold, Novo and Pioneer Resources all hold significant tenure packages focusing on the gold-bearing conglomerates.

## CTTR Mining Tenements 525 sq km

CTTR Mining's tenement E47/3891 ~ 155 sq km adjacent to Novo Resources / Pioneer Resources' Egina Project and directly to the northeast of Kairos Mineral's Croydon Project, where Kairos has discovered over 390 nuggets in conglomerates.

CTTR Mining's tenements E45/5064 and E45/5065 cover over 245 sq km about 20 km to the west of Port Hedland. The property is underlain by granitoids of the Sisters Supersuite and the Split Rock Supersuite as well as sediments of the Mallina Basin, which form part of the De Grey Superbasin within the Pilbara Craton.
